Professional Summary

Software Developer with 1.5 years of experience developing and supporting production-level applications using Java, Python, React.js, Node.js, SQL, and REST APIs. Experienced in Java Full Stack development, backend services, Agile methodology, debugging, code reviews, testing, and deployment across multiple environments.

Technical Skills

Languages	Java, Python, JavaScript, TypeScript, XML, PHP
Java / Full Stack	Java Full Stack, RESTful APIs, Backend Services, API Integration, React.js, Node.js, Express.js, .NET Core
AI / Data Science	Python, Generative AI, Machine Learning, Deep Learning, CNN, Computer Vision
Databases	MySQL, MongoDB, SQLite, SQL
Cloud / DevOps	AWS, Azure, Firebase, Git, GitHub, CI/CD, Jest
Engineering	Agile, Scrum, Sprint Planning, Code Reviews, Unit Testing, Debugging, Troubleshooting, Performance Optimization, Application Security, Scalability, Deployment

Experience

Cognizant Technology Solutions

Hyderabad, India

Programmer Analyst

June 2025 – Present

- Develop and maintain production level Java applications for a US-based client, working across backend services, REST APIs, database integration, and full stack application components, following established coding standards and best practices for clean, maintainable code.
- Work across the software development lifecycle including requirement analysis, development, testing, debugging, code reviews, troubleshooting, and deployment across development, QA, and production environments.
- Collaborate with architects, stakeholders and development teams while actively participating in Agile ceremonies including sprint planning, daily stand-ups, retrospectives to deliver project requirements within planned timelines.
- Resolve application defects and production issues while contributing to application performance, security, reliability, scalability, and maintainability.

Philips

Bangalore, India

Software Developer Engineer Intern

June 2024 – August 2024

- Developed enterprise application features using Java, React.js, JavaScript, and RESTful APIs, contributing to frontend functionality and backend service integration.
- Developed and integrated REST APIs and third-party services based on functional and technical requirements gathered in collaboration with architects and stakeholders.
- Worked in an Agile environment on sprint planning, stand-ups, retrospectives, code reviews, testing, debugging, troubleshooting, and defect resolution.
- Supported CI/CD based deployment and testing of application releases across different environments to improve release reliability.

Projects

Bone-Sense: Fracture & Implant Detection Software

2026

Python, Generative AI, Machine Learning, CNN, VGG16, ResNet50, DenseNet

- Developed a Python-based AI application for fracture and implant detection from X-ray images using machine learning and deep learning.
- Implemented and evaluated CNN architectures including VGG16, ResNet50, and DenseNet for automated image classification.
- Achieved 100% precision on the evaluated dataset for identifying fractures and implants. Received Philips internship offer through this.

Cartwish E-Commerce Platform

2026

MERN Stack, REST APIs, MongoDB, Node.js, React.js, Jest

- Developed a full-stack e-commerce application using React.js, Node.js, Express.js, and MongoDB with RESTful APIs.
- Implemented JWT authentication, product management, shopping cart functionality, and frontend-backend integration.
- Implemented Jest unit testing and deployed the application using cloud hosting platforms.

Education

SRM Institute of Science and Technology

Chennai, India

Bachelor of Technology in Computer Science and Business Systems; CGPA: 8.9

August 2021 – June 2025
